

IN THE FEDERAL GOVERNMENT

2012 RANKINGS

Deloitte.

The Best Places to Work in the Federal Government® rankings offer the most comprehensive assessment of how federal public servants view their jobs and workplaces, providing insights into worker satisfaction on issues ranging from leadership and pay to teamwork and work/life balance.

The rankings alert leaders to signs of trouble and provide a roadmap to help improve organizational performance and better manage our government's most important asset—its employees.

The 2012 results tell a troubling story about a workforce whose satisfaction and commitment level has dropped to the lowest point since 2003, when the rankings first launched. The government-wide index score fell 5 percent, from 64 (out of 100) in 2011 to 60.8 this year. The 3.2-point drop is the largest change in the history of the rankings. Meanwhile, employee satisfaction in the private sector remained constant, with a score of 70.0, according to Hay Group.

2012 GOVERNMENT-WIDE BEST PLACES TO WORK INDEX SCORE

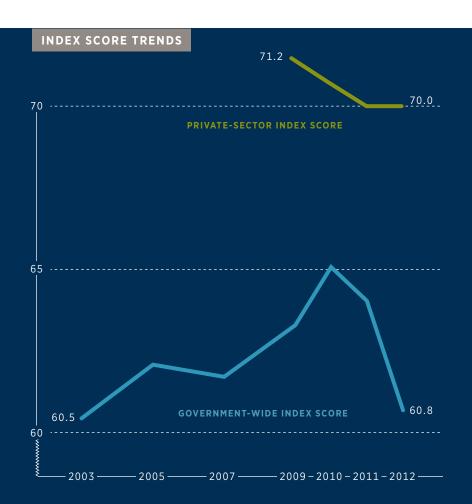

DECREASE FROM 2011 SCORE

Where does this number come from?

Responses to three questions from the Office of Personnel Management's Federal Employee Viewpoint Survey determine the *Best Places to Work* index score:

- 1. I recommend my organization as a good place to work.
- 2. Considering everything, how satisfied are you with your job?
- 3. Considering everything, how satisfied are you with your organization?

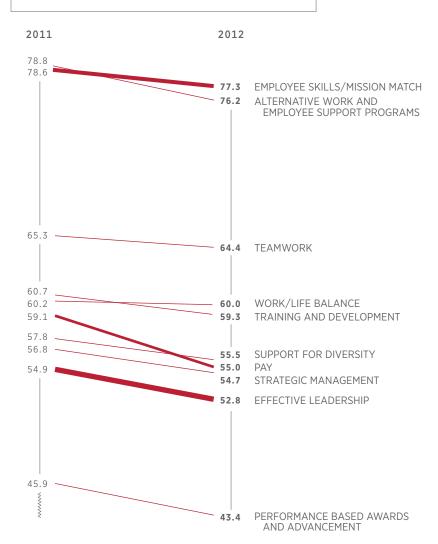

overnment-wide, the new rankings show a decline not just in overall employee satisfaction, but also in each of the other 10 workplace categories ranked by the Partnership for Public Service and Deloitte. Satisfaction with pay, which fell 4.1 points between 2011 and 2012 and 3.9 points between 2010 and 2011, showed the most significant drop. Rewards and advancement, which fell 2.5 points, experienced the next largest decrease.

The declining job satisfaction levels across the federal government come during turbulent times, with employees buffeted by many uncertainties and feeling the effects of hiring slowdowns, buyouts, increased retirements, budget constraints and a two-and-a-half year pay freeze that runs until the spring of 2013.

While many factors shape how employees view their workplaces and rate their satisfaction, the Partnership and Deloitte, with support from Hay Group, analyzed the 2012 data to determine which factors are the leading influencers. Effective leadership has been the key driver every year since the rankings launched in 2003, followed by a match between agency mission and employee skills. The third most important factor, satisfaction with pay, emerged for the first time in 2010, replacing work/ life balance as a key element for overall satisfaction and commitment.

ew to the *Best Places to Work in the Federal Government* rankings this year is the addition of a mid-size agency category to supplement the large and small agency groupings. The purpose is to provide comparisons of agencies that are closer in size. Agencies with more than 15,000 employees are classified as "large"; those with 1,000 to 14,999 employees are classified as "mid-size"; and any agency of 100 to 999 employees is considered "small."

The number one large agency in 2012 was the National Aeronautics and Space Administration, with a score of 72.8 (out of 100), followed by the Intelligence Community and the Department of State. In the mid-size rankings, the Federal Deposit Insurance Corporation took top honors with a score of 83.3, while the top-ranked small agency was the Surface Transportation Board with a score of 84.3.

In keeping with the government-wide trend, employee satisfaction decreased in 66.1 percent of agencies. Many agencies, however, defied the government-wide convention, including the Department of Transportation, a large agency that raised its score a full 4.1 points. The Office of Management and Budget was the most improved of any agency, with a 13.3-point increase since the 2011 survey. These agencies prove that even in the most challenging climates it is possible to improve employee engagement.

While it was a difficult year for most agencies, some lost far more footing than others. Of the large agencies, employees at the Department of Veterans Affairs expressed the biggest decrease in satisfaction, with a drop of 7.1 points, from 63.8 in 2011 to 56.7 this year. The biggest decrease in all groups was at the Federal Maritime Commission, with a drop of 21.9 points.

ABOUT BEST PLACES TO WORK

The *Best Places to Work in the Federal Government* rankings—the most comprehensive and authoritative rating of employee satisfaction and commitment in the federal government—are produced by the Partnership for Public Service and Deloitte.

The **Partnership for Public Service** is a nonpartisan, nonprofit organization working to revitalize our federal government by inspiring a new generation to serve and by transforming the way government works. To help leaders use their data to drive reforms, we launched an advisory services program that works in partnership with agencies to conduct custom data analysis and lead them through a series of action planning activities that identify and address employee concerns. To learn more, visit bestplacestowork.org/agencyservices.

Deloitte Consulting LLP is one of the world's largest management consulting providers. More than 6,600 professionals are dedicated to serving federal clients with wide-ranging missions. Deloitte brings a deep understanding of government requirements, processes, and systems—as well as insights into the workforce and technology issues that affect day-to-day operations. By drawing on industry-leading practices across government and business, Deloitte applies a mix of private-sector perspective and public-sector experience to help federal agencies in their efforts to address today's biggest challenges while building a stronger foundation for tomorrow. To learn more, visit deloitte.com/federal.

METHODOLOGY

The vast majority of the data used to develop the *Best Places to Work in the Federal Government* rankings was collected by the Office of Personnel Management's Federal Employee Viewpoint Survey. The survey was administered April 2 through June 30, 2012, to full-time and part-time permanent executive branch employees and completed by more than 687,000 federal workers, for a response rate of 46.1 percent. Participating agencies account for 97 percent of the executive branch workforce. The rankings also include responses from more than 9,000 additional employees at nine agencies who were surveyed at the same time and had a response rate of more than 50 percent. In addition, the rankings incorporate responses from employees of the Intelligence Community, which conducted its own similar surveys but did not report the number of respondents due to classification restrictions. In total, 362 federal organizations are represented in the *Best Places to Work* rankings.

Large agencies listed in the rankings are those organizations with more than 15,000 full-time, permanent employees. Agencies of 1,000 to 14,999 full-time permanent employees are included in the mid-size agency category. Small agencies are those with at least 100 but fewer than 1,000 full-time, permanent employees.

The *Best Places to Work* index is calculated using the percentage of positive responses to three workplace satisfaction questions and is weighted according to a proprietary formula. The workplace environment scores are calculated by averaging the percentage of positive responses in 10 categories, including effective leadership, employee skills/mission match and pay. Hay Group, our technical partner, performs regression analysis to determine the categories with the most influence on the *Best Places to Work* satisfaction score.
